

Rice

Chris Olivares and Maria Robles

Rice lab information

- How fast the rice grows.
- How rice adapts to the environment.
- How it adapts to drought . It doesn't need a lot of water.
- Combining the rice plants.

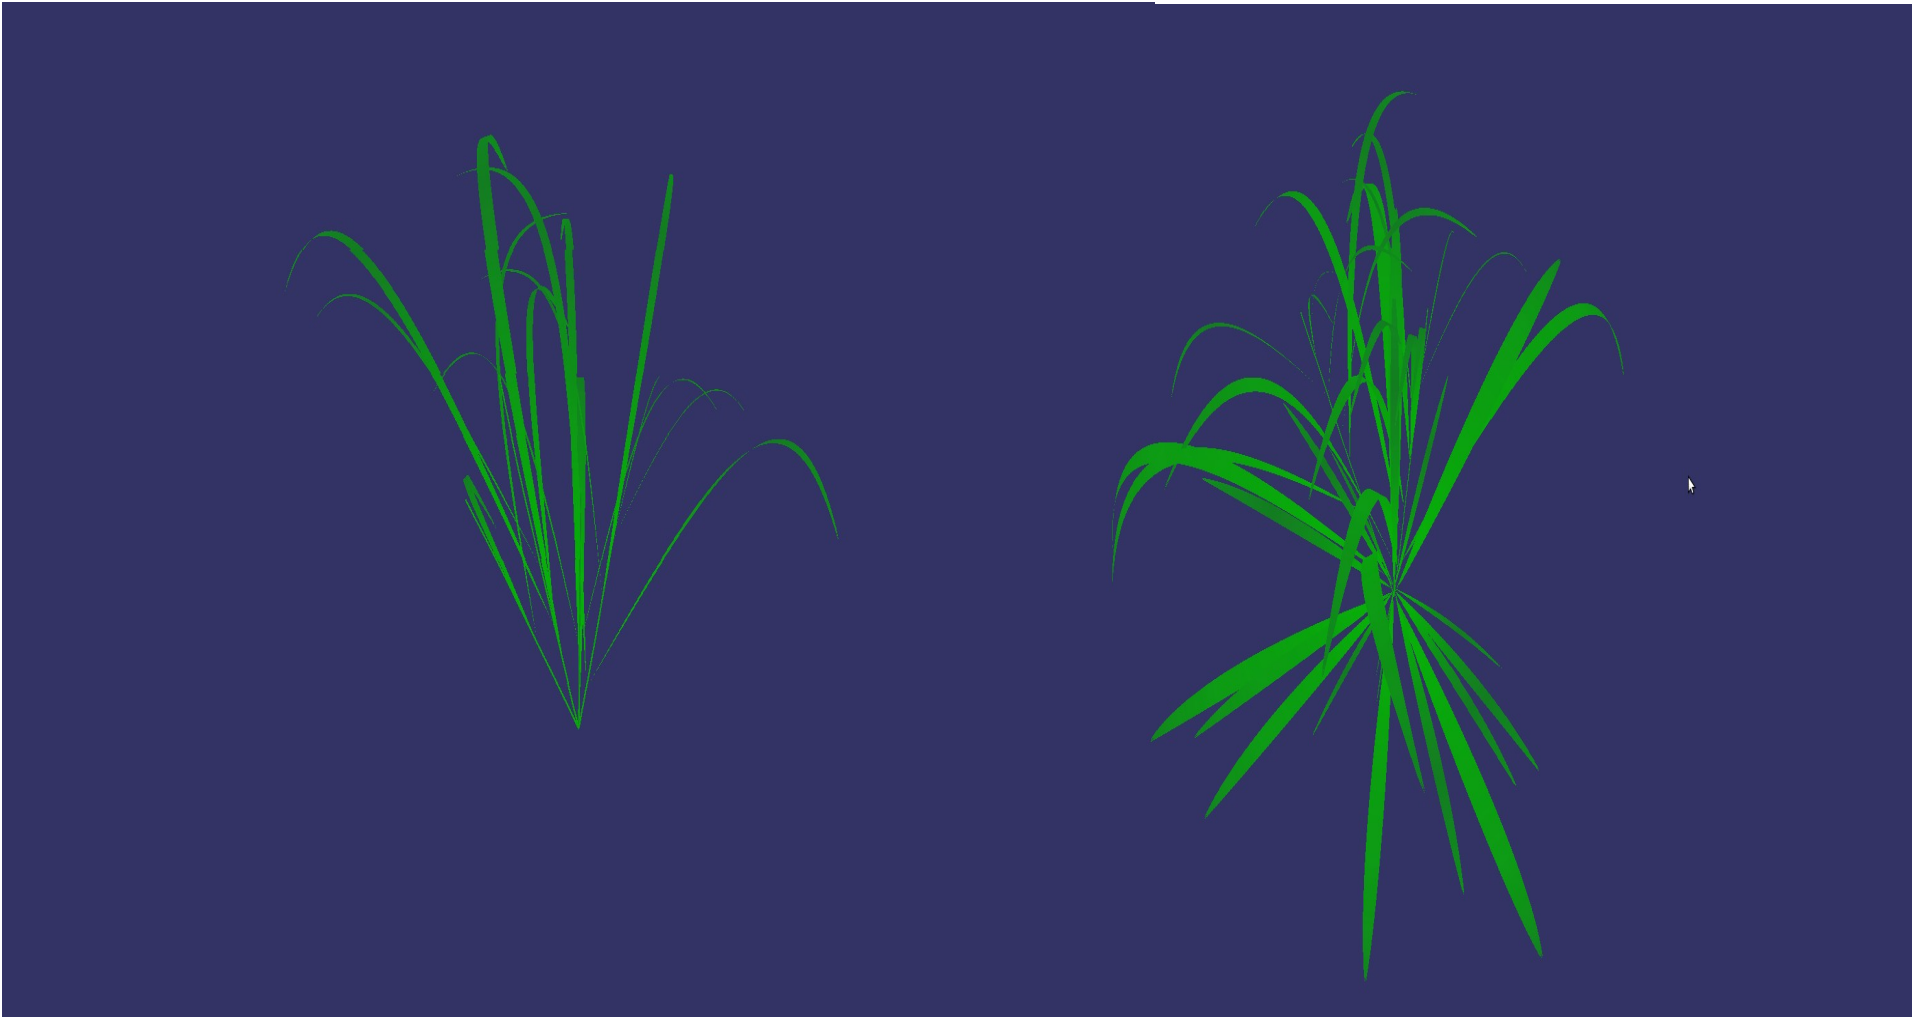

Why so important

- People want to find out where their rice came from. It is the Scientists job to find that out. They might do test to find out if its healthy.

How scientists help

- Scientist can find out what the plant lives or dies.
- They can check to make sure that its healthy.
- There trying to make it drought resistant. Like planting a gene that makes it drought resistant.

The model

- Bio 5 DNA Lab
 - Fungus Lab
 - Pollen Lab
 - Model Lab
 - Rice Lab
